

Biondan  
**Modular Niche System**

Patented

## Easy to Install, Adapt & Expand.

The Modular Niche System brings the high level of quality, durability, and reliability you've come to expect from Biondan to a modular, adaptable and easily maintained niche solution.

Based on our 60 years of experience, we have built a system from the ground up that:

- is made of the best quality materials and craftsmanship;
- allows ease of design – allowing for configuration to suit your needs, your cemetery, and your particular client base;
- is built around the principal of durability; and
- has a rational construction system that can be installed simply by your contractor, your staff, or our installation team – saving you money and time.

We applied the same, careful, from-the-ground-up design philosophy to our low-voltage LED lighting system, which gives you:

- an easily maintained durable & controllable lighting system;
- a built-in regulator for varied lighting conditions that will provide the dependable system you require; and
- our Biondan Commitment—we stand behind our product.

*Quality on the front, quality all the way through to the back,  
from the ground up.*

# Flexibility, durability, quality and ease of installation.

Available with bronze or aluminum fenestration, our Modular Niche System is constructed of zinc-coated, powder painted, steel boxes assembled double-walled to give you the strongest metal niche system you can find on the market.

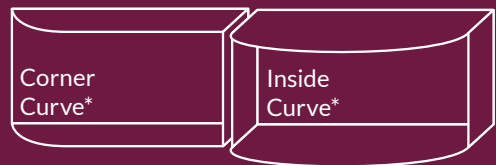

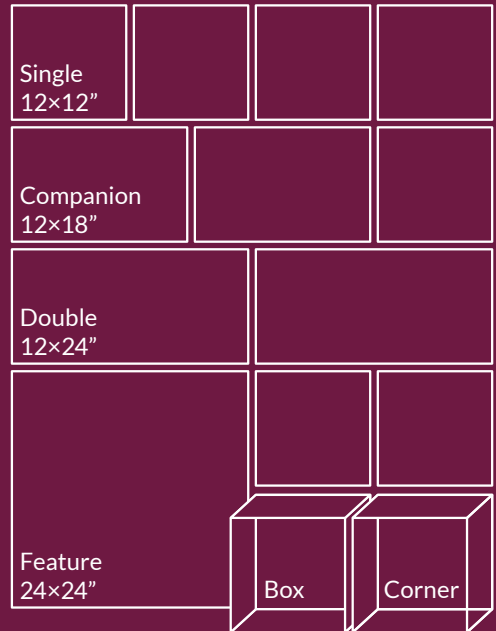

Each part has been designed for strength and ease of assembly — all while providing that flexibility for your unique installation.

Even if you change your mind after installation, our niches can be reconfigured to change a layout. Expand your unit as your needs change, while maintaining the original look and feel of the primary installation. You can grow at your own pace and in your own budget.

We offer 6mm thick, beveled glass fronts for all our niches, including our curves.

Our see-through niches come with 6mm tempered glass backs that match the clarity and durability of the whole system. Our selection of opaque shutters include beveled bronze, beveled aluminum, marble, granite, or specialty Kosmolux; all to suit your particular installation or artistic need.

Each niche is a unique, individual space... *The Last Home*. They are designed to give your customers that comfort of knowing that their loved ones are being placed in the best crafted, designed, and manufactured space that maintains the durability and dignity required in your cemetery. Biondan Quality: Made to Last.

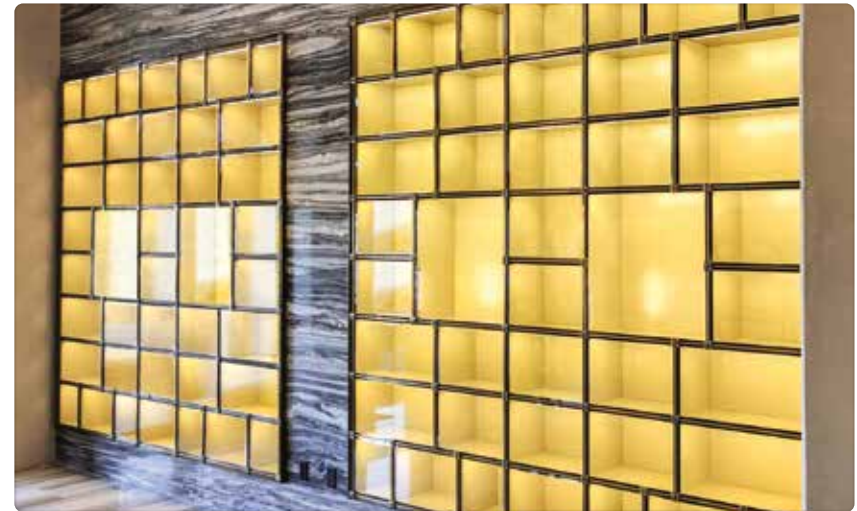

\*Curves must be set as complete columns.

## Contemporary Design, Classic Quality.

We believe that cremation niches are more than just a place to put an urn. Our design philosophy is embodied in the statement: *The Last Home*.

We design products to give our customers—and ultimately, their customers—a way to imbue these sacred spaces with their own personal expression of love and memory while maintaining the overall dignity necessary in a shared cemetery space. We offer a number of accessories and programs that introduce the right level of personalization. Our niches are not just niches, they are the last home.

Our difference is in the quality of our design, our materials, and our realization—Precious memories for *The Last Home*.

Ease of design, ease of installation,  
and ease of return on investment.

Talk to our representatives, they can show you how our niche programs can not only bring the quality and elegance your cemetery thrives on, but also how our system can bring the needed revenue and return on investment you require.

*Quality, Dignity, and Value –  
a Winning Combination.*
